

## optris® CTlaser MT

Non-contact temperature measurement through flames from 200°C to 1650°C

### FEATURES

- Accurate temperature measurement through flames in the range from 200°C to 1650°C to monitor workpieces inside ovens (heated with fire), to measure inside chemical reactors and to observe the brick temperature in combustion chambers
- Double laser aiming marks real spot location and spot size up from 1.6 mm at any distance
- Optics 45:1 with selectable focus, compact sensor head size
- Usable up to 85°C ambient temperature without cooling and automatic laser switch off at 50°C
- Cooling and protection accessories for harsh environmental conditions
