Order number configurator

| | If AUX is not used to power any peripheral device, the AUX may be set to "OFF" during standby; this ensures that the total driver standby power is less than 0.5W. If left blank, the default AUX standby option is "ON". |
|--------------------|--|
| AUX standby | The AUX output can be either "ON" or "OFF" when the driver is in standby mode. If a peripheral device depends on the AUX for normal operation, even if the driver is in standby mode, this option shall be set to "ON". |
| | If left blank, the default AUX voltage is 16V. |
| AUX voltage | The AUX voltage is selectable in 1V increments between 4V and 16V and 2V increments between 16V and 24V. |
| LED output current | Enter value in 1mA increments, e.g. "811" for 811mA |
| P/N | LED driver part number. |
