

# Light is our passion

## 30W 0-10V LED Driver with Smooth Dimming to 1%

#### **ECOdrive**

Programmable digital ECOdrive LED driver providing standard LED fixtures with the smoothest flicker-free dimming to 1% light output, delivering value to any application. The LED driver is compatible with the 0-10V lighting control protocol, and works seamlessly together with LED modules, controls and intelligent luminaire elements.

#### **Product offering**

#### ECOdrive 30S-M1Z0A

Part number (P/N)	EC30S-M1Z0A1
Product description	ECOdrive, 30W, 0-10V, 1 control channel, constant current, 1x 42V output, side feed, square metal

#### Features & benefits

Natural dimming	Dim to 1%, smooth brightness changes, excellent flicker performance, adaptable dimming curves, configurable minimum dimming level
Symbiosis	Seamless interoperability with LED modules, controls and in-luminaire intelligent devices
LEDcode	Configurable design to work with most constant current LED modules and arrays, while providing a connection point to integrated peripheral controls
Programmable	Fine-tune your driver for any application
Performance	Universal input voltage range, low inrush current and total harmonic distortion (THD), high power factor and efficiency
Camera compatibility	Hybrid HydraDrive technology is proven to work in TV studios and security camera environments

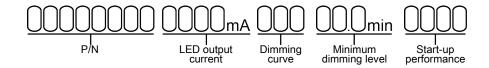

Programming tools		
Programming interface	TOOLbox pro (TLU20504)	
Programming cable set	TOOLbox pro to LED driver, programming cable, 5pcs (TLC03051)	
Programming Hand-held, Touch-and-Go	PJ0050HL1	
Programming jig	PJ0500SS1	
Programming software	FluxTool	

## Warranty

## Order number configurator

P/N	LED driver part number.
LED output current	Enter value in 1mA increments, e.g. "811" for 811mA
Dimming curve	"LOG" for logarithmic (default)
	"LIN" for linear
	"SLN" for soft-linear
	"SQU" for square
Minimum dimming level	Leave blank for default minimum dimming level of 1.0%. Specify in 0.1% increments, e.g. "10.5" for 10.5%.
Start-up performance	Enter "CA24" for improved start-up performance to comply with ENERGY STAR Luminaires v2.0 and the latest CA Title 24 standard, effective January 2017.

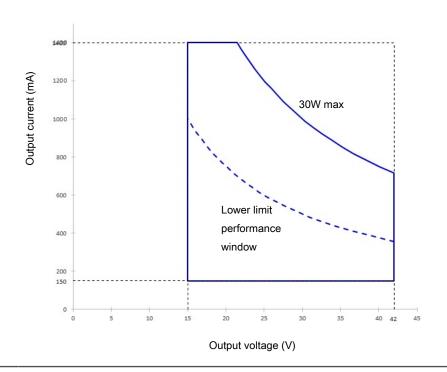

Input characteristics	
Nominal input voltage range AC	120 - 277V (UL)
Absolute input voltage range AC	108 - 305V
Maximum input current	0.35A @ 120V / 60Hz
	0.15A @ 277V / 60Hz
Input frequency range	50 - 60Hz
Efficiency at full load	83%
Power factor at full load	>0.95
THD at full load	< 20%
Maximum inrush current	< 200mA <sup>2</sup> s @ 120V / 60Hz
	< 200mA²s @ 277V / 60Hz
Surge protection	2kV differential mode (DM) 2kV common mode (CM)
Maximum standby power	0.5W

Output characteristics		
Maximum LED output power	30W	
Number of LED outputs	1	
Programmable LED output current range	150 - 1400mA	
LED output type	Programmable in 1mA increments within specified current range	
LED output current tolerance	+/- 5% at programmed LED output current	
LED output voltage range	15 - 42V	

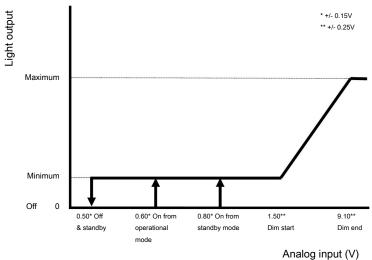

#### Operating window

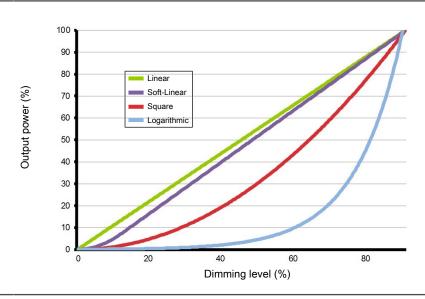

Control channels	1	
Control protocol	0-10V	
	LEDcode	
Dimming range	100% - 1%	
Dimming curve options	Logarithmic (default) Linear Soft-Linear Square	
Dimming method	Hybrid HydraDrive	
0-10V current draw	< 0.6mA	
Time delay to standby	<30s	
0-10V dimming chart		* +/- 0.15V

Dimming curves

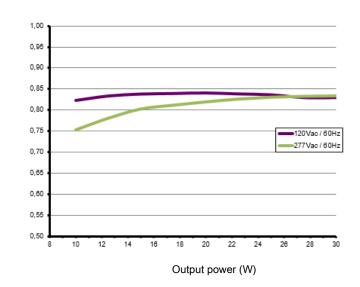

#### **Performance**

Typical efficiency vs load

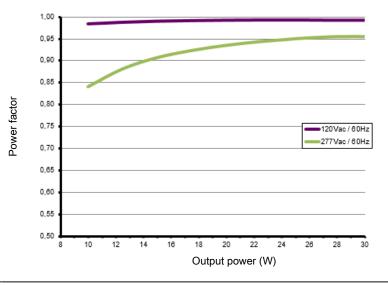

Tested with a load of 6 LEDs in series, programmed for 1400mA and at 25 °C ambient temperature. The measurements below 30W were performed by dimming the light output.

Efficiency (%)

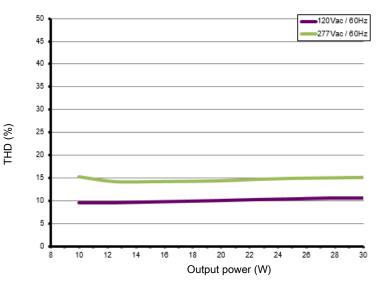

Typical power factor vs load

Tested with a load of 6 LEDs in series, programmed for 1400mA and at 25 °C ambient temperature. The measurements below 30W were performed by dimming the light output.

Typical THD vs load

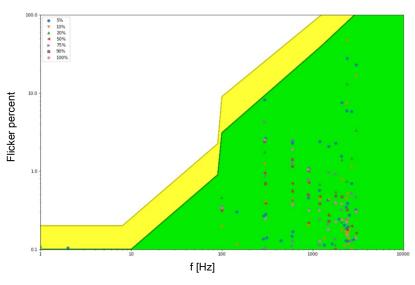

Tested with a load of 6 LEDs in series, programmed for 1400mA and at 25 °C ambient temperature. The measurements below 30W were performed by dimming the light output.

#### Typical flicker performance

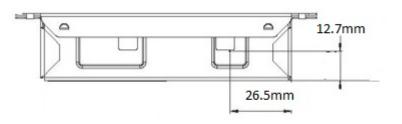

Typical flicker percent as a function of frequency, measured across the dimming range. The results are overlaid with the low-risk (yellow) and no observable effect (green) levels as defined in IEEE P1789.

#### **Environmental conditions**

Operating ambient temperature (Ta) range	-20 °C to +50 °C
Maximum operating case temperature (Tc max)	75 °C
Lifetime	50000 hours at a maximum case temperature (Tc) of 75 °C

TC point location

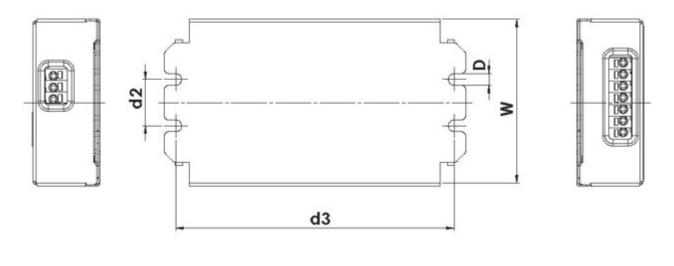

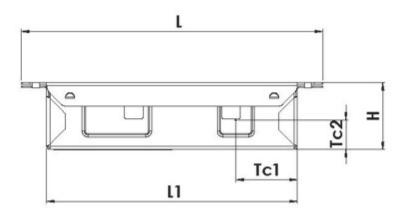

T	TI LED ( ) ( ) ( ) ( ) ( ) ( ) ( ) ( ) ( ) (
Thermal	The LED output current is decreased whenever the internal LED driver temperature exceeds factory preset temperature. The LED output current is increased again once the internal LED driver temperature drops below this internal temperature threshold. If the internal LED driver temperature continues to increase, despite a decrease in output current, the LED driver will shut down
LED output short circuit	The LED output current is cut off whenever the LED driver detects a short-circuit. The LED driver will attempt a restart every 400ms after a short-circuit is detected.
LED output overload	The LED driver decreases the LED output current sequentially, until it reaches its maximum rated power, whenever a load that exceeds the LED driver's maximum rated power is connected to the LED output.
Reverse polarity	The LED driver will not yield any current if the polarity of the load on the LED output is reversed. This situation will not damage the LED driver but may damage the LED load.
LED protection	
Thermal protection LED	An external NTC thermistor, which is placed on a PCB near the LEDs, can be connected to the driver via the LEDcode/NTC terminals. The output current to the LEDs is then decreased by 75% whenever the NTC exceeds a maximum allowable temperature, which is specified by the user in the FluxTool software. The default NTC temperature limit is set to 70 °C.
Thermistor value	47kΩ
Suitable thermistors	leaded: Vishay, P/N 238164063473 screw: Vishay, P/N NTCASCWE3473J

#### LED driver mechanical details

Length (L)	typical: 130.0 mm / 5.12 in
	maximum: 132.0 mm / 5.20 in
Width (W)	typical: 72.4 mm / 2.85 in
	maximum: 73.7 mm / 2.90 in
Height (H)	typical: 29.0 mm / 1.14 in
	maximum: 29.7 mm / 1.17 in
Mounting hole diameter (D)	typical: 5.0 mm / 0.20 in
	maximum: 5.3 mm / 0.21 in
Center to center mounting hole distance (d2)	typical: 20.0 mm / 0.79 in
	maximum: 20.2 mm / 0.80 in
Center to center mounting hole distance (d3)	typical: 120.0 mm / 4.72 in
	maximum: 122.0 mm / 4.80 in

Length excluding flanges (L1)	typical: 108.8 mm / 4.26 in
	maximum: 110.8 mm / 4.36 in
3D files available on product web page	IGS STEP
Weight	282 g
Mounting torque	Not to exceed 0.5Nm

## **Packaging**

Length x Width x Height	130x108x38 mm / 5x4x1 in	
Weight (including products)	12 kg	
Products per box	40 pcs	

## **Connector layout**

## Input wiring specifications

Connector type	push-in terminals
Connector supplier and series	DECA MWX420-500A series
Wire type	solid copper
Wire core cross section	0.5 - 1.5 mm² AWG 20 – 16
Wire strip length	9.0 mm

Restriction of hazardous substances	RoHS3 (Directives 2011/65/EU-2015/863/EU)
SVHC-list substances	REACH Art.33

## Certifications

Safety	
<u>A</u>	Risk of electrical shock. May result in serious injury or death. Disconnect power before servicing or installing.
<u></u>	The LED driver may only be connected and installed by a qualified electrician.  All applicable regulations, legislation, and building codes must be observed.  Incorrect installation of the LED driver can cause irreparable damage to the LED driver and the connected LEDs.
	Pay attention when connecting the LEDs: polarity reversal results in no light output and often damages the LEDs.
<u></u>	LED drivers are designed and intended to operate LED loads only. Powering non-LED loads may push the LED driver outside its specified design limits and is, therefore, not covered by any warranty.
i	eldoLED products are designed to meet the performance specifications as outlined at certain operating conditions in the data sheet. It is the responsibility of the fixture manufacturer to test and validate the design and operation of the system under expected and potential use cases, including faults.
i	Please observe voltage drop over long cable lengths. Longer cable lengths increase EMI susceptibility.
(i)	Product renderings and dimensional drawings are generic for the housing type.  Product label, connector type and quantity may vary.
