

**SmartReflect Light barriers**

**O200.SP-11210573**

ambient conditions	
operating temperature	-25 ... +50 °C
protection class	IP 67
communications interface	
baud rate	230,4 kBaud (COM 3)
adjustable parameters	switching point time filters LED status indicators output logic counter operation mode deactivate the sensor element Find Me function Teach-in mode
IO-Link port type	Class A
process data length	32 Bit
process data structure	Bit 0 = SSC1 (presence) Bit 2 = quality Bit 3 = alarm Bit 5 = SSC4 (counter) Bit 16-31 = 16 Bit measurement
interface	IO-Link V1.1
additional data	excess gain operating cycles device temperature
cycle time	≥ 0,6 ms

**beam characteristic (typically)**
