• Each modular color lens can be added without additional tools

QTC model uses a special contact structure for stable operation, the lens modules lock into place by rotating the modular structures together. This allows for easy changes to the color arrangement without any tools. Additional modules can be added.

• QTC Series Special Lens

QTC Series added a separate color filter lens inside the outer lens to help provide a clear signal.

• Buzzer volume is adjusted via the volume control lever

QTC type volume can be adjusted for each specific working condition with the equipped buzzer volume control lever at the bottom of the product.(-BZ type)

1 High volume buzzer (100dB) option can be fitted to the top of the product. (Customization)

High volume 100dB volume buzzer module fastened to the top of the product provides 360 degree buzzer signal output which cannot be achieved with the single directional buzzer.(Buzzer volume cannot be adjusted)

2 Integrated cover and lens model (QTCA50/ QTCA60/ QTCA70)

The sleek body cover and lens model is made of one piece for a simple unified look.

3 Cable end M12 connector attached type (Customization)

Pre-wired is standard. Can customize the product with the M12 connector if requested.

4 Can select from a variety of mounting brackets option to fit your application needs and build environment

There are a variety of mounting options brackets available depending on cost and installation requirements.
